feeling better

garden collection 2016

design by
Raffaello Galiotto

#feelingbetter è profumo d'estate, di cene all'aria aperta, di giochi in giardino, di notti stellate.

#feelingbetter è baciarsi al chiaro di luna, assaporare un gelato, leggere il libro preferito, scambiarsi confidenze fra amici.

Da 25 anni Nardi lavora per far sentire bene le persone proponendo arredi per l'outdoor dal carattere giovane, frizzante, coloratissimo ... uno stile easy-chic che interpreta la voglia di vivere all'aria aperta. Tavoli, sedute, poltroncine relax, lettini prendisole dai colori pieni, brillanti e resistenti agli agenti atmosferici, atossici, completamente riciclabili e, in alcuni casi, anche allungabili o ripiegabili. Tutto rigorosamente Made in Italy.

Per respirare gioia e relax, per sentirsi bene e far star bene gli altri.

Nardi, #feelingbetter

#feelingbetter is the scent of summer, outdoor meals, games in the garden, starlit nights.

#feelingbetter is kissing in the moonlight, enjoying an ice-cream, reading your favourite book, sharing stories with friends.

For 25 years Nardi has strived to make people feel better by creating fresh, colourful and jazzy outdoor furniture... Nardi brings an easy-chic style which interprets its clients desire to enjoy life in the open air. Tables, chairs, relaxing armchairs and sunbeds with colourful designs, bright features, created for all types of weather, non-toxic, entirely recyclable and, in some cases, even foldable or extendable. All Nardi's furniture is rigorously Made in Italy. Breathe in happiness and relaxation. Feel better and make others feel better too.

Nardi, #feelingbetter

anodizzato

L'anodizzazione è un processo elettrolitico che aumenta l'ossidazione delle superfici prevenendo la corrosione con uno strato protettivo. Anodizing is an electrolytic procedure that increases oxidation of the surfaces, preventing corrosion with a protective layer. L'anodisation est un procédé électrolytique qui augmente l'oxydation des surfaces empêchant ainsi la corrosion grâce à une couche de protection.

Die Eloxierung ist ein elektrolytischer Prozess, der die Oxydierung der Oberflächen erhöht und der Korrosion mit einer Schutzschicht vorbeugt. La anodización es un proceso electrolítico que aumenta el poder de oxidación de las superficies evitando de esta manera la corrosión mediante una capa protectora. A anodização é um processo electrolítico que aumenta a oxidação

das superficies prevenindo a corrosão com uma camada protectora. Анодирование представляет собой электролитный процесс, который повышает окисление поверхностей, предотвращая коррозию благодаря образованию защитного слоя.
